

HEALTH CARE COUNCIL *of Chicago*

The **Health Care Council of Chicago (HC3)** is an action-oriented collaborative that brings leaders from across the health care ecosystem together to solve the city's most important health-related issues.

HC3's pillars are pursued through the following activities:

Events and Programs

HC3's in-person and virtual events and programs foster continuity amongst and between members through uniquely brokered interactions and feature local and national subject matter experts to educate and inspire solutions to address local issues.

Initiatives and Special Projects

HC3 manages strategic initiatives and convenes work groups for special projects to address specific health-related issues locally to engage a cross-section of civic, community, and business leaders to solve urgent health care challenges.

Partnerships and Relationships

HC3 cultivates a community of collaborative partnerships and connects people across the Chicago ecosystem to advance efficiencies and innovations capable of transforming Chicago's health status.

Mission

HC3 harnesses the collective intelligence and resources of Chicago's health care leaders to drive meaningful change and positively influence the conditions that impact the health of our communities.

Vision

HC3 creates uncommon alignment throughout the city's ecosystem to strengthen the health and well-being of all Chicagoans.

HC3 Members

HC3 members represent a variety of stakeholders from the health care industry in Chicago, ranging from hospitals and providers to investors and marketers. Together, we're making an impact and driving real health care change in our local communities.

Additional HC3 2022 Highlights

HFS Transformation Collaborative

In September, the Illinois Department of Healthcare and Family Services chose six health care collaboratives for the State Fiscal Year 2023 cycle of the [Healthcare Transformation Collaboratives](#) program, which aims to close gaps in health care services and eliminate the barriers to access and inequities that persist in Illinois' health care system. HC3 is proud to be part of the **PATH (Pediatric and Adolescent Transformative Healthcare)** initiative led by the Saint Anthony Hospital Foundation. As part of this collaboration, HC3's role will be to strategically disseminate information and best practices, support research on health inequities in the Chicago market to complement the collaborative's goals, and manage a learning collaborative to advance change management strategies among project participants and beyond.

Foster Care Moonshot

Illinois' foster care rates outpace states with larger populations, and the system is at a critical point in adequately serving children and families in need. Earlier this year, HC3 conducted stakeholder interviews and in March 2022, convened an exploratory roundtable session with social service provider organizations and advocacy groups to begin to lay the groundwork for improving the system of care in support of "child and family well-being." A collaborative partnership with key stakeholders and HC3 is still in development, along with the opportunity for a "family well-being" report for Chicago and/or the State of Illinois to be developed in 2023.

Community Partnerships

Partnerships have been essential to HC3's operational activities to drive opportunities for change in the health of the city of Chicago. HC3 continues to advise and provide direct support services to community organizations such as [Acclivus](#) our longstanding collaboration focused on advancing violence prevention efforts, to our newest partnership in support of women's socioeconomic and health care needs on the south side of Chicago with [WHI \(Women's Health Initiative\)](#). In addition to direct connections and consultative support for community organizations, HC3 was actively engaged with several partner collaboratives in 2022, including the [Chicagoland Healthcare Workforce Alliance \(CHWC\)](#), [Foxglove Alliance](#) (an initiative managed by the [Hektoen Institute](#)), and the [Corporate Coalition of Chicago](#). As always, we continue to operate with the notion that our efforts alone cannot change the health care ecosystem and continue to seek more allies addressing the needs of the systems and local communities to help advance opportunities.

Looking Ahead

HC3 remains committed to exploring opportunities to enhance our efforts to foster innovation and change across the health care ecosystem. There are several activities and programs that were developed in 2022 that we are excited to launch in 2023:

- **Community Pulse** a CAN TV production presented in partnership with Foxglove Alliance (a Hektoen Institute initiative) and Hektoen's Nurses in the Humanities
- The commencement of HC3's inaugural **Strategic Advisory Council**
- The continuation of the **Future of Work Program Series**, as well as the launch of other series and specialty programs focused on health equity, price transparency and investment in health care
- The relaunch of our website with a **"members-only portal"** and more exclusive features
